

Are heaters available? | 1

There are electric heaters in the rooms. Pisac is considerably warmer than Cusco, and due to the thick adobe walls and small rooms heat is retained. Pisac inn has down comforters, and extra blankets or hot water bottles are available upon request. It is good to bring warm lightweight layers, as the common areas of the hotel are not heated, and can be very cold especially in the months of June, July and August. We do have a fireplace in the main dining area and a heater for the inside patio area.
